GAME 1
MAJORITY RULES

This is NOT trivia, but great for crowd participation and reactions!

We ask the question, but the crowd decides what is correct.

The faster players vote the more points they get.

We finish with **BATTLE ROYALE** mode where there are 4 options and if players choose the option with the least votes, they loose all their points and have to fight to get back to the top of the leaderboard.

GAME 2
SPLIT

The game has 10 rounds. Each round the value of the pot goes up and YOU get to decide who gets to keep it.

Players start on the middle white square.

Each round players move 1 space to a different colored square. Then vote for which color gets to SPLIT the points (the more people on the same square, the less they get to keep). The trick is... you can't vote for your own color.

Watch out for the center white tile, every other round it is locked and players will have to wait a turn to get out.
